

Transmissions About the Origins of Christianity

Transmitted from the Universal Mind (aka "Cosmic Awareness")

through Paul Shockley while in a trance state
from [ArchiveTC](#) Website

This Awareness wishes to remind you that *the story of Jesus*, the first written word, was that which was put down some 80 years after his existence on this plane, that it wishes also to inform you that the composite known as the entity *Jesus* was that which was put together from a variety of information.

This Awareness indicates that essentially, under Constantine, the concept of the Catholic or Universal religion (Catholic meaning Universal), the official Roman religion, as that which was a composite of various religious writings which were brought together to form that which is known as the Christian religion. That many of the writings were assembled from various sources, and brought into, and comprised those books of the Bible.

(...)

This Awareness suggests, there is a book by **Lloyd Graham** titled "[Deceptions and Myths in the Bible](#)", that this book goes into the origin of the stories that have been related in the Old Testament, especially in the Old Testament, which were literally taken, in many cases word for word, or concept for concept from earlier writings.

For example, the *story of Noah* and his four sons having been taken from writings which long predated the stories in the Old Testament and which used terms and names for the sons which were identical to those reported in the Old Testament.

This Awareness indicates that the *story of Moses* as having been stolen from a Syrian myth that had come down in relation to an entity names Misis. This Awareness indicates that a great number of the stories within the Old Testament were simply the result of the Hebrew priests attempting to create a set of myths and stories by which they could organize their own religion, their own philosophy, in order to form a more cohesive society in those days.

This Awareness indicates that the works of Lloyd Graham go deeply into finding these earlier stories from Babylon, which was the source of the *story of the Garden of Eden*, through Syrian and other cultures and Indian records and stories of India.

This Awareness indicates that even the New Testament is assembled from patterns related to stories taken from earlier sources, such as Zoroastrian, Mithraism, Krishna, Buddhism, and Egyptian, and others, in which many verses are literally paraphrasing earlier writings, and many of the stories attributed to the story of *Jesus*, were lifted directly out of these other writings.

The story of *Jesus* at the well, as one which was taken from earlier writings. This Awareness indicates that it is of importance that entities realize the origins of the Bible did not come from the pen of *God*, but came from the earlier writings in different cultures and nations at the time these Hebrew priests put this work together.

This Awareness indicates that these countries who were plagiarized then became labeled as *heathen*, nations whose philosophies were *heathenistic*, but this was only after their stories had been stolen.

(...)

This Awareness indicates what occurred in Rome was a political effort by Constantine to gather the energies of conflicting religious groups and to bring them together to stop the warring and fighting between these groups that was tearing Rome apart.

The action of Constantine was that he informed those religious leaders of the various warring sects in Rome that if they did not come together and join in some kind of compromise religion, their religion would not be recognized or legal in Rome, thus, most of those came and put their best effort into giving their particular religious dogma and values and their deity into the compromise that was formed which became the Holy Roman Catholic religion, "catholic" meaning "universal."

(...)

This entity **Apollonius of Tyana** is the central figure of a certain religious order that was prevalent at that time in Rome and his life was incorporated into the Holy Roman religion or Catholic version of the Christian epic which became the official Roman religion in approximately 300 AD.

This Awareness indicates that this energy of Apollonius was incorporated, there was also energies of several other spiritual leaders of Roman religious sects whose stories were also brought in and there were those spiritual personalities or deities from other Roman religious orders whose histories or religious myths came from other cultures.

Krishna for example, of India, was one of the religious cults and groups in Rome, and his story was merged with that of Apollonius of Tyana. The story of Krishna as that entity who came into the earth born of a virgin and who attempted to save people from error and sin, but who was hanged for his efforts.

This Awareness indicates that this was incorporated in the story of *Jesus* and the Apollonius story was also part of this story, and there were also entities whose religion was that of sun worshipping, wherein there was the sun and the 12 houses or signs, and these sun worshippers had their story of *Jesus* in which the sun god had 12 disciples and these 12 disciples of course reflected the 12 signs of those who were the sun worshippers in Rome. This was of course an astrological religion.

(...)

This Awareness indicates there was of course an entity whose name was *Hesus* and this entity came from Nazareth, lived in the area of Nazareth, and therefore, there was an entity *Jesus of Nazareth* who was one of the various entities in the composite, but much of the information attributed to the composite was information relating to other entities: Apollonius of Tyana for one, Krishna for another, and

the sun god of the Roman sun worshippers, Helios, as another.

This Awareness indicates it realizes this is extremely confusing to many people. It does not expect entities to fully understand this, nor does it care whether entities accept this. This Awareness is only dedicated to giving truth as it sees it in response to questions asked.

(...)

This Awareness indicates it appears that the *story of Heysoos of Nazareth*, that this entity had a following and was the one who was crucified on the cross, that the entity Heysoos of Nazareth in his sojourns had learned much from studying with Indian teachings.

This entity had learned, for example, the art of moving into suspended animation and when the entity was crucified, he gave the appearance of being dead, by moving into a state of suspended animation.

Once it was assumed that he was dead, he was removed and placed into a tomb, and later resurrected. This Awareness indicates that this is the entity who went with Mary Magdalene in the direction of France and England. This Awareness indicates that the entity from Tyana went westward toward India and many of his experiences later were attributed to, were associated with and reflections of the story of *Christ*, and therefore, it was presumed that he was the *Christ*.

This Awareness indicates that in understanding that these entities were each contributors to the story of *Jesus the Christ*, one can see how there could be many different forms of evidence of the *Christ* story continuing in different directions.

(...)

This Awareness indicates that it wishes to explain how the suspended animation is effected and how it works to give the appearance of death. This is still practiced by some entities in India, wherein through deep breathing exercises and meditation, entities can fill the body with oxygen so that the bloodstream is saturated with oxygen and when it is saturated with oxygen, the heart and the breathing activity no longer have to do their work.

The heart does not have to pump blood to the brain to give new oxygen to the brain because all of the blood in the body by this time is saturated with oxygen, therefore, the heart can slow down and stop moving. This Awareness indicates that this process is taught through the meditation called *Kriya Yoga*. *Kriya Yoga* has been taught in the United States through the Self-Realization Fellowship teachings of *Paramahansa Yogananda*.

This Awareness indicates that in *Kriya Yoga*, the breathing action occurs over a period of time with each breath carrying more oxygen into the body than is expelled, until the body is highly oxygenated, so that the blood throughout the body is filled with oxygen, and when this occurs, the heartbeat has been gradually brought to a halt.

If there is no heartbeat and is no breathing, no energy is being expended and no more oxygen needs to be brought in, the entity can lie in suspended animation for up to approximately as long as 30 days. Some may even go longer, but most in the early stages of this development of the suspended animation will stay in for minutes or hours at a time.

Masters of the art can stay for days or weeks or even months without breathing. This Awareness indicates there is no pulse, there is no heartbeat, there is no breath going in or out, and the entity appears dead.

This Awareness indicates occasionally you may hear of someone who comes back to life suddenly, such as at their funeral, or someone who looks in the coffin at an entity during his funeral ceremony and the entity's eyes suddenly focus, or he moves or looks and the people seeing this, realize he is alive, and occasionally these entities are brought back to life. There is no known understanding of how it happened, but the entities were still alive.

The embalming process, which is required in many countries now, tends to have made this a more infrequent occurrence. Once the blood is exchanged for embalming fluid, there is no likelihood of the entity coming back to life. This Awareness indicates however, that in third world countries, where embalming is not practiced, and in ancient times, when embalming was not practiced, these entities might still be alive, with the appearance of death.

Thus it was with the entity *Jesus* at his crucifixion, and he came back to life and this was called the Resurrection. This Awareness indicates that these entities then moved, after that experience of the crucifixion, as a family, along with Mary Magdalene who was the daughter of Joseph of Arimathea, through France and on up to England as described in the book "Holy Blood, Holy Grail".

This Awareness indicates that at a later time, this became the motivation for the creation of the Knights Templar, and this Knights Templar became a protector of the Holy Grail. But the Grail was not a cup: it was the blood of the family, in a genetic sense, the carrying on of this holy family in its generation and descendancy.

This Awareness indicates that there are books out about this in a kind of underground networking or recognizable form of structure which the Church has long sought to keep subdued and to destroy in terms of any evidence or any exposition.

[The secret organizations](#), particularly those that came out of the [Knights Templar](#), which includes the [Rosicrucians](#) and the [Freemasonry](#) organizations, have sprung from these earlier groups of people who were dedicated to the protection of the Holy Family as it moved toward England, and later toward America.

This Awareness indicates that it was mostly [the Jesuits](#) who were set about to destroy these energies of the Holy Family to keep them from surfacing, because the very action of the information coming out would be detrimental to the dogmatic myth or structure promoted by [the Church](#). This Awareness indicates the Jesuits were essentially behind [the Inquisition](#), and there is also even today, a threat of destruction to entities who bring out this information.

This Awareness indicates it does not wish to go into any of this deeply at this time, but to point entities to the books that are available for entities to research in this area if they so desire.

(...)

This Awareness indicates that the truth often hurts, yet truth also makes entities free. It is important that entities accept what they believe to be truth and to keep their minds open in regard to things they hear or read, to discover whether there is truth that can be useful. It is not asking that you believe what this Awareness has given, it is asking that you keep your mind searching, open, willing to consider, able to think without having your mind already made up.

This Awareness indicates that it has given before: the true mind is never really thinking until it turns to question everything it knows.
